AmLag122
No, I have Extreme 1.61 and I burned this game using imgburn and burned it once on 2.4x and another on 2x and
im using the activation key. After I have used the activation key I inserted red redemption, and the red image
comes up where the data stands with a shotgun and I press play and the image just stays black (nothing
happens). What have I done wrong? Btw, I have not used any more patcher program. Please help!

AmLag122
I've been downloading for 3 days leaving my computer on. please send I promise I will send for 2 months

AmLag122
Yes, this game is awesome! You can read a tool review, and also use the original game for PS2, an authentic GBA,
a PS2 console, and the Magnificent Seven movie here: <http://www.gutenberg.org/files/14844/Red.Dead.Redemption-Region/>

AmLag122
Thanks for upload! Awesome game, Works perfectly, burned with imgburn at 4x using imation disc

AmLag122
hey guys is this good to play online?

AmLag122
Oh, this game is one of the best of the year maybe the best of all but its not bug free. The other day I was playing
and suddenly the Y you know yellow button stop working anymore so I could not ride horses and do a lot of things. I
had a saved game and it goes ok now but I have not see a bug like this on 360 before (all the other buttons was
working great) Anyone else who see this bug?

AmLag122
10/10 Amazing thanks man!!!!

AmLag122
Downloaded burned at 2.4x used verbatim dv d and I put the disc in and it shows play game. I hit play game then
error comes up saying the disc is unreadable what did I do wrong?

AmLag122
great torrent thank you it is a great game he been playing online and everything is perfect

AmLag122
@freshbombs did u use Verbatim DL-R or R? My opinion -R works better did u download the latest Dashboard
update for your 360? It might be a damaged DVD

AmLag122
If u did not update your 360 or u don't know by the tutorial You never know it might be the problem (To be honest
I don't think so because if its an update matter it will give u a message to update your console) But u never
know <http://support.xbox.com/support/faq/faq.aspx?cid=933498&cid=1033498>

AmLag122
And finally there is a tutorial (kinda old but still going strong) for to burn
games <http://www.gutenberg.org/files/14844/Red.Dead.Redemption-Region/14844-Red.Dead.Redemption-Region-360-games.html>

AmLag122
@AmLag122 only the best. -R I don't know if it is the disc I'm not sure when I ran it through abgc it said the
verification failed.

AmLag122
AmLag122, maybe its just a bad dvd burn.

AmLag122
he burned 2 rdt discs on fuji/fuji dv's and when ever I put em my xbox I just get stuck at a white xbox 360 screen
and it says im watching a dvd, and it have blue play and fast forward options I burned at 2.4x can anyone help?

AmLag122
I am new to the can some one pls explain to me how to download red dead redemption for my xbox???

AmLag122
what is the safest way to play burned games on my xbox pls help???

AmLag122
someone pls help me how do I mod my xbox 360??

AmLag122
for im new here..
I have Extreme 1.61, can I download the torrent burn it and play, or do I need some backup programs to downgrade
more or whatever..

AmLag122
please tell me how to make it work, cause with boot dvd I cant start games neither.

AmLag122
thank you

AmLag122
just downloaded this file, and in total I have audio, is and video, is
not where is it?

AmLag122
No worries @AmLag122 I have copied dude.. I look u must have in a folder an image file 31 bytes and in a
WinRAR 7.23 OS the iso file. Some times u have the iso file. Download IMAGEMagic and Run IMAGBurn and then
write image file to dvd/burner for a file and u choose the small one (u just can't miss it) and Image file 31
bytes write speed 12x and Write Remover u must have both the Image file 31 bytes and the iso file in the same
folder and Imgburn will do the rest. Don't worry the iso file my self use Verbatim DL-R. Can't be a different if u think
its the same thing.

AmLag122
Why doesn't this work for me? I have Extreme 1.61 and burned it with imgburn (2.4x, verbatim)
and test updated through a flash drive

AmLag122
he there.

AmLag122
I just updated my xbox to Extreme 1.61.
I burned red dead redemption and a patcher call convention but when I put it in my xbox, nothing happened. It didn't
recognize it and just said "Open tray" like nothing is on the disc.
Then I hit the DVD to my PC to check if there are actually any files - everything was fine, there was even the
system update folder.
After that happened I found out about abgc and patched it with the correct patches from abgc.
Still not working. I used verbatim disc and burned 2.4x.
Battled had company 2, and if other non were 6 games work fine.
Could someone help me? I have no idea what is the problem.

AmLag122
Thanks

AmLag122
how do I get this big image on to a dvd???

AmLag122
Thanks everyone your very helpful
